

# Yachtmaster

Yachtmaster is a high tenacity polyester double braid with a loose sheath construction which is softer in the hand. A general purpose sinking rope with a stable construction keeps the rope round. Polyester has excellent UV and abrasion resistant properties and will not shrink or lose strength when wet. This rope is easier to splice than a conventional Polyester Braid due to the loose construction and is favoured by riggers. It is an ideal rope for genoa sheets and quick splice halyards.

## FEATURES

- Easy splicing
- Easy handling
- High tenacity and abrasion resistance
- High resistivity to UV and most chemicals
- BS EN 697
- ISO 10554
- Strength not affected by water
- Does not shrink
- Sinking rope

## TECHNICAL

- Core: HT Polyester
- Cover: HT Polyester
- Construction: Double Braid

## APPLICATION

- Sheets
- Halyards
- Control Lines
- Out/downhauls
- Guys
- Runner Tails
- Kickers
- Reefing Lines
- Furlers
- Travellers
